To contribute to the well-being and further development of the academe by imparting and enhancing the knowledge and skills I have acquired in the industry.

Experience

Wizard Manpower and Allied Services, Inc., Document staff

July 2018 - February 2019

Assist the manufacturing staff with organizing, managing, and filing commissary documentation. Ensure all records are accurately completed, properly stored, and readily accessible when needed. Collaborate with team members to maintain an efficient documentation process, adhering to company standards and compliance requirements

Telephilippines Inc., Technical Support Representative

March 2019 - January 2021

Respond to incoming calls from customers who require assistance with telephone and internet-related issues. Provide support by troubleshooting problems, guiding them through potential solutions, and ensuring their concerns are addressed promptly and professionally. Maintain a friendly and empathetic tone while resolving technical difficulties, escalating complex cases when necessary to ensure customer satisfaction.

TripodLink Global Solutions Co., Software Developer (Team Lead)

July 2021 - Present

Develop, design, and maintain software products tailored to streamline and enhance laboratory and hospital processes. Collaborate with stakeholders to identify system requirements, implement user-friendly solutions, and ensure seamless integration with existing workflows. Manage a team of developers, providing guidance and support to achieve project goals, while overseeing the planning, execution, and delivery of software projects. Focus on delivering high-quality, reliable, and efficient applications that support critical healthcare operations, all while adhering to industry standards and best practices.

Education

Aurora State College of Technology

Bachelor of Science in Information Technology, June 2014 - April 2018

Skills

Project Mangement, C#, VB.Net, Asp .NET Core, Restful API, WebSocket, MYSQL / MSSQL / SQL, Entity Framework, Machine integration using ASTM, HL7, and File Sharing, HTML, CSS

Projects

Supplier Notification App

Utilize a tech stack consisting of Angular for the front-end, ASP.NET Core for the backend, C# for application logic, and SQL Server as the database to develop a web application. The application enables users to import a list of data from an Excel file, process the data efficiently, and automatically send emails to designated departments or individuals. Ensure seamless user experience, robust data handling, and reliable email notifications by integrating modern web technologies, efficient database management, and adhering to best practices.

Guidance Management System

Leverage a tech stack consisting of Native PHP for server-side development and MySQL as the database to create a robust application. The app is designed to efficiently record and manage student data, track student guidance cases, and oversee graduate studies information. It facilitates smooth data handling, ensuring seamless management of academic records, case updates, and study progress. The application aims to improve the organization of student-related information, ensuring that data is easily accessible, secure, and up to date
